LÍNGUA INGLESA – 2ª SÉRIE DO ENSINO MÉDIO – OFERTA B – 1º DIA – 10 QUESTÕES (TIPO C)

Professor Ulysses Cesar · Língua Inglesa

Objetos do conhecimento: Simple Future (will) · Be Going To · Future Continuous

Eixo temático: Semana do Cerrado · Matriz de Referência do PAS/UnB

PROVA REGULAR

Instruções: Leia o texto de apoio e marque a alternativa correta (A, B, C ou D).

Read the text below and answer the questions.

The Cerrado is Brazil's second largest biome, and its future will depend on the decisions of the next few years. Researchers say that, if the current rate of clearing continues, the biome will lose another large part of its native vegetation before 2040. The federal government is going to expand its monitoring programme, and several states are going to create new protected areas. Environmental organisations are going to work directly with farmers, because they already decided that conservation and agriculture will have to coexist. By this time next year, satellites will be monitoring the whole biome, researchers will be collecting data on the 3,000 plant species of the region, and thousands of students will be discussing the Cerrado in their schools during the Semana do Cerrado.
